

We are pleased to inform our employees, customers and vendor partners that Prosegur has become the leading shareholder in Best Security Industries (BSI). In this new era for BSI, we are excited to announce that Matt Sack will remain fully committed with the project both as partner and chief executive.

With the addition of BSI, Prosegur completes its fourth acquisition in the US market after acquiring Viewpoint in September 2018 and Cipher and Command Security Corporation in February 2019. These companies have a deep knowledge and are highly recognized in the technology, remote monitoring, cybersecurity and security services markets.

By adding their capabilities, we are managing to create a nationwide pure player in Enterprise Risk Security, focused on providing our clients with the most Integrated and Advanced Security Solutions.

It is with great enthusiasm that we are launching our operations in the United States, the largest private security market in the world. We believe the US is a great opportunity for all us as this market genuinely values service quality and the active use of technology is rapidly becoming a key differential factor.

We will work from now on to introduce our Prosegur Integra proposal to the North American market, providing integrated solutions tailored to each client and with a high-quality level. All over the solid foundations of two key pillars: our people and technology.

Working together, each of the four companies is now stronger and so is Prosegur.

We invite you to join us in making this project a real success.
